

FLOWMETER

PRECISE WATER USAGE

FlowMeter accurately measures flow rates and sends detailed data through the Doktor App, ensuring efficient water use. Eco-friendly and versatile, it can integrate with any water meter and run on 2G connection. Its easy installation, universal compatibility, and reliable data logging, even offline, make it an essential addition to any irrigation system.

Benefits

● SEAMLESS SETUP

Easy to set up, making it a convenient addition to your irrigation system.

● INSIGHTFUL IRRIGATION REPORTS

Access detailed daily and weekly irrigation reports through our user-friendly app.

● COMPATIBILITY WITH ALL WATER METERS

Connects effortlessly with any water meter equipped with a pulse output.
Supports 2G networks for seamless communication.

Comprehensive Irrigation Management

Combine FlowMeter with Doktor's Agricultural Sensor Station to achieve smarter, more precise irrigation management. Track soil moisture changes with real-time graphs to optimize your irrigation, conserve water, and ensure maximum crop protection. Access all data easily through the Doktor App mobile & web clients to analyze results.
